Home learning ideas: Weather

Choose a task for each week of the term. We want you to be engaged with your homework so there is a lot of choice for you. You can either share your work electronically or add to your homework book.

Weather Watcher Keep a weather diary for three days. Draw the weather each day and record whether it is sunny, cloudy, rainy or windy. Which type of weather did you see most?	**Pack for the Weather** Draw a suitcase for a trip to a hot place and another for a cold place. What clothes and items would you pack for each? Explain your choices. 	**Weather Art** Create a picture using colours, shapes or collage to show a type of weather. You could make a windy, rainy, snowy or sunny scene. 	**Make a Rain Gauge**  With an adult, make a simple rain gauge using a clear plastic bottle. Leave it in a safe place outside and check it after rainfall. Draw or record what you notice.
Habitat Hunt With an adult, explore your garden, local park or outdoor space. Draw or photograph two different habitats. What plants or animals might live in each? 	**Mini-beast Detective** Look carefully under leaves or near plants (remember to be gentle). Draw a mini-beast you find and describe where you found it. Return it safely to its habitat.	**Build a Bird's Nest** Use natural or recycled materials to make a model bird's nest. Think about how the materials might help keep eggs safe and warm. You do not need to use real feathers. 	**Who Lives Here?** Choose an animal and find out about its habitat. Draw the animal in its home and label what it needs to survive, such as food, water, air and shelter.
